

BERTL'S BEST 2009

14th Annual Awards

Best Asset Management Solution

MWai
M2M Solutions

- Intelligent Device Management™ (IDM) is a fully automated solution for data acquisition and transmission with real-time integration with leading ERP/CRM systems
- intelligent Managed Print Services™ (iMPS) delivers quick assessment of connected equipment such as meter reads, consumable levels and status on demand or at pre-scheduled intervals
- scope™ creates a secure connection between the dealership and the client location. Using Sharp's i-DVM™ front panel service utility, technicians can remotely access enabled equipment for firmware upgrades, equipment configuration and to run diagnostic tools
